

OPPORTUNITIES FOR RESEARCHERS MOBILITY IN EUROPE

UNITE: UpgradiNg ICT excellence by strengthening cooperation between research Teams in an enlarged Europe

UNITE Project is a EU-FP7 funded coordination action, gathering 5 institutions that are committed in increasing the level of excellence of ICT research across an enlarged Europe by promoting active secondment to research teams and strengthening cooperation in community supported research on Enterprise Interoperability (EI), Enterprise Software Applications (ESA), and the novel research domains of the “Future of the Internet”.

The project aims to support the flow of skilled people among universities, research institutes, and business-related companies between countries of the old member states (EU15) and countries of the new members states (EU27). One solution to acquire and disseminate knowledge in such a framework is to meet other partners in multiple environments, during a period of time, depending on the experience of the researchers through this mobility programme.

Besides the secondment programme, UNITE Project will organize targeted workshops and two doctoral symposiums, across an enlarged Europe to build-up synergies and support networking and collaborations.

Secondment with UNITE

The UNITE project aims to support the flow of skilled people among universities, research institutions, and business-related companies between countries of the old member states (EU 15) and the countries of the new member states (EU 27), and vice-versa.

Topics of Interest

Secondment and networking activities will be conducted in three sub-domains identified from the objectives of the “Future of the Internet”, namely the Internet of Services (IoS), the Internet Things (IoT), and the other areas from the Future of the Internet (oFI) gathered in a single sub-domain.

<u>Internet of Things (IoT)</u>	<u>Internet of Services (IoS)</u>	<u>Other Areas from the Future of the Internet</u>
Integrated solutions for inter-enterprise interoperability	Service architectures & components	Network of the Future
Collaboration and networked enterprises	Testing, verification and validation	Trustworthy ICT
Architectures and platforms for the integrated enterprise	Virtualised infrastructures	3D and Media Internet
Next generation RFID	Service front ends	
Tools and technologies that enable intra-enterprise collaboration	Innovative service and software engineering methods and tools	
Sensor Networks		
Enterprise Interoperability (EI)		
Enterprise System Applications (ESA)		

Who Might Be Interested?

- Professors
- PhD Students
- Post-Graduates Students
- Researchers
- IT Experts

How to Apply?

- Go to www.unite-europe.eu
- Choose a research topic
- Choose a host organization
- Fill out the appropriate forms, available on the web site
- Send them to the UNITE Virtual Front Office

What Will Be Funded?

Group 1 (1000 €/month): Bulgaria, Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Romania, Slovakia, Slovenia

Group 2 (1100 €/month): Austria, Belgium, France, Germany, Greece, Ireland, Italy, Portugal, Spain

Group 3 (1250 €/month): Denmark, Finland, Netherlands, Luxemburg, Sweden, UK

Secondment Grants also cover way and return travel expenses.
